**Why boring could be good for this star's two intriguing planets**  
A nearby red dwarf doesn't emit flares or harmful radiation — so its planets might have atmospheres.

**Chromosomal alterations among age-related haematopoietic clones in Japan**  
Population-specific patterns of genomic mutations and selection of haematopoietic clones in Japanese and European participants predict the divergent rates of chronic lymphocytic leukaemia and T cell leukaemia in these populations.

**Daily briefing: Sled dogs could be the oldest dog breed living today**  
Modern sled dogs, which include huskies and malamutes, split from other types of dog at least 9,500 years ago. Plus, the second-largest outbreak of Ebola ever is over and project-management software for scientists.

## Consumer acceptance of novel food technologies

### Access & Citations

**1510**

Article Accesses

**0**

Web of Science

**0**

CrossRef

Citation counts are provided from Web of Science and CrossRef. The counts may vary by service, and are reliant on the availability of their data. Counts will update daily once available.

### Online attention

**35**

● 46 tweets

● 2 blogs

This article is in the 93<sup>rd</sup> percentile (ranked 11,126<sup>th</sup>) of the 166,183 tracked articles of a similar age in all journals and the 66<sup>th</sup> percentile (ranked 6<sup>th</sup>) of the 18 tracked articles of a similar age in *Nature Food*

Altmeter calculates a score based on the online attention an article receives. Each coloured thread in the circle represents a different type of online attention. The number in the centre is the Altmeter score. Social media and mainstream news media are the main sources that calculate the score. Reference managers such as Mendeley are also tracked but do not contribute to the score. Older articles often score higher because
